

# ReportStream

CDC's free, single connection to streamline your data transfer and improve public health

## What it is

ReportStream is CDC's intermediary platform that aggregates and securely delivers ELR data from organizations and testing facilities directly to public health entities.

**ReportStream now supports all reportable conditions.**

## How we help you

- 1) Talk with our team to create your plan.** We work with your preferences to accept data in HL7 and FHIR and deliver data through SFTP or REST.
- 2) Start sending or receiving data.** Through our secure, scalable, cloud-based platform, data is validated, routed and transformed to the required jurisdictions in the correct format.
- 3) Stay updated on the status of your data.** View your online dashboard, or get help when needed through our expert, on-call support team.

## Contact us

Our team will set up a time to talk about your needs and if ReportStream is right for you.

Email **reportstream@cdc.gov**.
