

ReportStream

Your single connection to simplify data transfer and improve public health

What it is

ReportStream is CDC's free interoperable platform that aggregates and securely delivers public health data from organizations and testing facilities directly to public health entities.

How we help you

- 1) Create a personalized plan to meet your unique public health data needs.** Our expert team works with your preferences to accept data in HL7, FHIR, CSV, and deliver data through multiple connection types.
- 2) Start sending or receiving data.** Through our secure, scalable, cloud-based platform, data is validated, routed and transformed to the required jurisdictions in the correct format.
- 3) Stay updated on the status of your data.** Our expert support team is on call and ready to solve any problems that arise throughout your use of ReportStream.

Connect with us

Our team will set up a time to talk about your needs and if ReportStream is right for you.
